

MY JOURNEY WITH WATER

Your Impact at Coastal Cleanup Day 2022

Thank you to more than 4,193 volunteers who joined us with [Heal The Bay](#) last weekend to rehabilitate our local environment on California Coastal Cleanup Day! Thanks to our organizing partner, Heal The Bay, we were part of more than 35 significant in-person cleanup events across Los Angeles County, where volunteers removed over 9,700 pounds of trash and debris from our local beaches, waterways, parks, and neighborhoods.

Water for LA is a program to transform LA County residents from passive water consumers to empowered and informed water advocates dedicated to sustainability and health for all. Through simple steps you can take at your home, you can be part of the water supply solution.

Please help us to continue to deliver the message about the importance of clean and healthy water supplies. Follow us on [Instagram](#), [Facebook](#) and [Twitter](#) to learn how you can conserve our water and keep it clean, spread the word and stay up to date!

Thank you again for supporting Water For LA and LA County Public Works – and don't forget to visit [WaterForLA.com](#).

Drop the Hose – Use Microfiber Instead

Did you know that washing one car can use up to 100 gallons of water? This is not ideal, as the water in LA County is in short supply. We must do everything needed to make every drop count. Remember: even small actions at home have a big impact on the environment.

Watch the video below to learn more about how you can conserve water when washing your car!

Visit WaterForLA.com to learn about other water conservation and pollution prevention ways.
