Water for LA, Water for the Win: PSA with Dave Roberts and Lindsey Horvath

Water for LA recently filmed a PSA video featuring some very special guests: Coach Dave Roberts and Supervisor Lindsey Horvath!

Set against the picturesque backdrop of Vista Hermosa Park in Los Angeles, the video highlights how teamwork amongst water agencies, elected officials and community leaders will help ensure a sustainable and reliable water future for all of LA County.

Watch the video at the link below.

LADWP Adopts LA County Water Plan

In August, the Los Angeles Department of Water and Power (LADWP) formally adopted the LA County Water Plan, joining seven other leading local water agencies in signifying its commitment to securing a safe, reliable water future for all of Los Angeles County.

As the largest municipal utility in the nation, LADWP's adoption of the plan marks an important step in realizing the plan's goals, which include increasing the region's water supply by 600,000-acre feet by 2045 through stormwater capture, recycled water, water conservation, and other strategies.

Mark Your Calendars for Coastal Cleanup Day 2024!

Join Water for LA as we celebrate Heal the Bay Los Angeles' **35th annual Coastal Cleanup Day!**

Coastal Cleanup Day is an international day of action to protect our oceans, watersheds, and wildlife from trash and plastic pollution. This year, attendees will have the opportunity to contribute to removing 2 million pounds of trash from local waterways while helping Heal the Bay raise \$35,000 to continue this important work year-round.

Visit the link below to find a Cleanup Day Site near you, register to volunteer and learn more.

LA Water Project Highlight: Alondra Park Stormwater Capture Project

Located in the unincorporated community of El Camino Village, LA County's **Alondra Park Multi-Benefit Stormwater Capture Project** will revitalize the existing Alondra Park.

The project, which broke ground earlier this year, includes construction of a new drainage system to capture and treat stormwater along with enhancements to the park, including new multipurpose turf fields and upgraded baseball fields. The Project also includes nature-based solutions with the planting of native and drought-tolerant vegetation and trees, bio-swales, and permeable pavements that mimic natural processes, which will improve stormwater quality by preventing stormwater pollutants from ultimately discharging into to the Dominguez Channel.

Save the Date: Water (R)evolution Symposium

The Council for Watershed Health's upcoming Water (R)evolution Symposium will introduce interested parties to current and future recycled water projects and provide an opportunity to connect with staff and gain valuable insights resources.

The full-day event will feature speakers and panel dialogues to provide perspectives from agencies, community organizations, academia, and elected officials within the water space. There will also be networking opportunities and tours of the Grace F. Napolitano Pure Water Southern California Innovation Center and A.K. Warren Water Resource Facility.
